

Regional Manufacturing Institute of Maryland (RMI) & Maryland Energy Administration (MEA)  
Launch Cost-Free Air Handling Assistance Program for Maryland Manufacturers

# MANUFACTURING DISRUPTION MITIGATION ASSISTANCE PROGRAM

***"Protecting Maryland's manufacturers against COVID-19 is absolutely vital to our state's health and economic recovery."***

Larry Hogan  
Governor,  
State of Maryland

***"A key factor in reducing the chances of a COVID outbreak in a manufacturing facility is air handling - including air flow, filtration and ventilation."***

Larry Schoen  
PE, Fellow, ASHRAE

Manufacturers can potentially reduce the risk of business disruption from COVID-19 by improving facility air flow, filtration & ventilation. RMI's Manufacturing Disruption Mitigation Assistance Program (MDMAP) can help eligible Maryland manufacturers with this process.

Through our Manufacturing Disruption Mitigation Assistance Program, our contracted team of engineering professionals:

- Provide an in-depth, onsite assessment of a manufacturer's site and system operations related to ventilation and energy efficiency.
- Identify solutions (e.g., HVAC system upgrades) and a strategy for improving facility air flow, filtration & ventilation.
- Identify opportunities to increase energy efficiency.
- Assist in identifying and applying for funding resources (e.g., tax incentives, rebates, grants, loans, etc.) for the identified opportunities, solutions and strategies.

**ALL AT NO COST TO PARTICIPATING  
ELIGIBLE MANUFACTURERS!**

**Contact RMI today at  
[stacey@rmiofmaryland.com](mailto:stacey@rmiofmaryland.com)  
or 443-844-0047 for details.**

\* Must be a Maryland manufacturer to participate.  
Other restrictions may apply. RMI can help determine eligibility.
